

Safety Inspector Course (40 hours)

This unique 40-hour course provides industrial, construction and other safety & health professionals with the next-level knowledge required to successfully manage a company or hotel - wide safety program.

This Safety Inspector Course will give participants a more holistic view of safety's role in project company and hotel success, as well as advanced tactics and best practices for managing all aspects of a corporate safety program.

Participants who successfully complete the course will become Certified Safety Inspector authorized to implement a safety management program.

Prerequisites. Students will have to attest to the fact that they meet the prerequisites when they sign in the first day of the class (**see below: Attachment A, Verification Prerequisites**).

Update Requirement. To stay current on relevant safety matters, the Certified Safety Inspector is required to attend Update Class for Safety Inspector (yearly 8 hours) to remain certified. If a Safety Inspector certification status has expired, they will have a three-month grace period after their expiration date to take the update course. After the three-month grace period, a Safety Inspector Certification status may only be reinstated by retaking the complete course.

Topics:

- The role of a Safety Inspector, tasks and responsibilities
- ARBO wet vs. 29CFR 1926 OSHA Construction Industry Regulations
- Aruban Local Safety Laws and Regulations
- The role of management and staff (Philosophy, Policy, Procedures and Practices)
- Building stones of a Safety Management System
- Communication and safety meeting structure
- Risk management and Job Safety Analyses
- Managing a Field Safety Inspection Program
- Accident Recordkeeping Requirements and best Practices
- Training program employees
- Safety Inspections and toolbox-meetings
